- ★ Provides facility to enter delivery note of credit customers as per day to day schedule
- ★ Create invoices in a single click against a batch of delivery notes

PRODUCTION

WHY SWITCHING TO ELIXIR ERP

- ★ Elixir ERP enables companies to integrate their supply chain, provide robust and future-proof backbone systems
- ★ Increase information transparency and improve productivity through better sales and procurement handling.

MULTIPLE PLANNING STRATEGIES

Production would follow production-order, long sheets and bars are made-to-stock. Costing for made-to-stock happens based on standard approaches but for made-to-order, costing happens based on the nature of the order and material requirements. Such complexities in planning strategies and costing can be handled by ERP solutions in the most efficient manner.

PRODUCT VARIATIONS

- ★ Change of grades essentially means change in raw material configuration. Elixir ERP system helps the floor manager to automatically design the components based on the order and helps handle the processes from the sales order to the finished goods.

- ★ System handles the BOM efficiently, alternate BOM selection can be easily managed through system

HANDLES VARIABLE PRODUCTION PROCESSES

- ★ Manufacturing involves batch processing, continuous processing and a combination of both. For example, both the blast furnace and the converter work in batches, the caster works continuously for individual units and the finishing lines work in batches again.
- ★ Batch selection can be done by analyzing order requirements, characteristic inheritance and shipment planning.
- ★ Elixir ERP systems supports variations in the production processes through automatic batch selection based on order, raw material forecasts and production scheduling
- ★ Able to integrate and handle machine controls systems, process controls, inventory management, production schedules, forecasting, reporting, human resources management

COUPON MANAGEMENT

STOCK MAINTENANCE

- ★ Keep track of the number of coupon books available in your store
- ★ Manages to issue coupon book to sales man from store
- ★ Quick verification of the coupon books of each sales man

CUSTOMER FOLLOW-UP

- ★ Keeps the record of books sold to customers and the balance number of leafs in each book
- ★ Provides the option to transfer coupon books between customers with available leaf count
- ★ Can cancel coupon book from store or in hand of the sales man or the ones issued to customers and blocks the leafs from getting scanned even after several months or years
- ★ Scanning of the coupon leafs from customers can be done in fraction of seconds

ACCOUNTING COUPON SALE

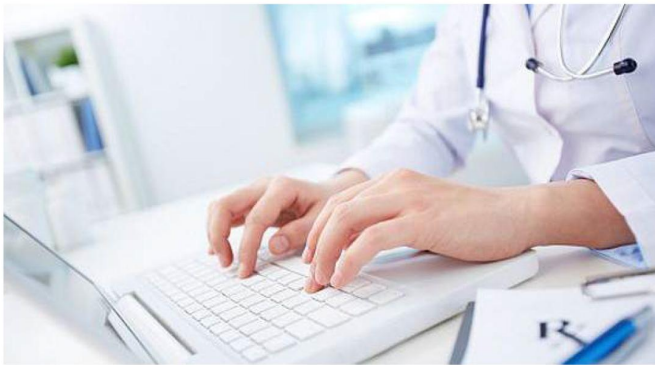

- ★ Coupon posting to accounts based on the daily scanned coupon leafs can be done with the option to enter the value of leaf suggested by the accounts department
- ★ Reports generates complete records of the coupon books in each store, sales man
- ★ Flexible report for customer reminders to issue new coupon books which also filters based on the leaf count
- ★ Sales man wise report to calculate the after performance allowance to sales man based on the coupon sales

COUPON TRACKING

Option to track coupon book, coupon leaf in a single click

HOSPITAL & CLINIC MANAGEMENT

WHAT IS HOSPITAL MANAGEMENT SOFTWARE ?

- ★ The hospital management system software is a tailor-made application designed to cater to the complex business requirements of a hospital, nursing home and healthcare institutions in keeping track of inpatient, outpatient, doctor availability, billing etc.
- ★ These are highly specialized software designed to take care of all aspects of a hospital operation.

WHY A HOSPITAL NEEDS CENTRALIZED MANAGEMENT SOFTWARE ?

A central management system works in tandem with the different platforms like sales, billing, accounting, customer care etc. to create a convergent, integrated environment that produces results in real time.

MODULES IN HMS ?

- ★ Hospital software is a central database that stores information related to inpatient, outpatient, doctors etc.
- ★ Hospital management system offers records on real-time to check availability of beds, inventory, doctor charges, scheduling of doctor appointment and more
- ★ POS and billing application to ensure correct and efficient billing with no delay
- ★ Maintain proper medical and other records and thus, facilitates documentation
- ★ Helps hospitals in maintaining transparency at every level of operation
- ★ It offers multi-user facility which ensure that multiple users can access to the hospital billing software at the same time.
- ★ Offers efficient staff management and allocation of doctor and staff duty

KEY FEATURES

- ★ Functions as a database to store all patients related information inpatient as well as outpatient on real-time
- ★ Managing patient records and asserting data security and confidentiality
- ★ Manages availability of doctors and scheduling appointment
- ★ Staff management and allocation of duties
- ★ Managing laboratory equipment
- ★ Managing ward and bed allocation
- ★ Inventory management with timely warning system for stock refurbishment in pharmacy
- ★ Accounting and correct billing
- ★ Head management and appointment management functions
- ★ Multiple user accessibility for efficient all-round performance

ADVANTAGES

- ★ The data is updated and stored in real-time
- ★ Ensures data security and prevents misuse of information
- ★ Hospital software Provides complete history on a patient regarding past and current treatments being offered
- ★ Helps with documentation as required by internal laws
- ★ Offers transparency and integration between different departments and ensure smooth functioning of a complex hospital environment
- ★ As a convergent platform, hospital management system integrates between different existing set-up
- ★ Reporting is another important feature of a management application. It produces various types of accounting and other reports

ACCOUNTING AND ADMINISTRATION

- ★ The second most important purpose that hospital software satisfies is tracking of accounting and financial transaction.
- ★ It helps hospitals maintaining transparency and therefore facilitates auditing.
- ★ It functions as a central repository of patient's records offering real-time data on a convergent platform and thus helping hospitals in abiding by data security and confidentiality rules set by authorities.

SCHOOL & LIBRARY MANAGEMENT

MODULES

- ★ **Student Module :** A place where you can manage all student activities and operations at one go. This module allows separate ids for each and every student at your school. Let your students log in, to get details from your school directly. Maintains separate page for every student in your institution, with one click you can get access to complete information of a specific student including- personal details, mailing address, last fee payment details, attendance report and so on
- ★ **Parents Module :** Is crafted with lot of concentration on what parents can expect or what they may look for. Parents who have no time to visit the school but are very much concerned about their child's studies would also love to get through the details at a few clicks. Logging into their account, parents can view reports on attendance of their child, performance at studies or in co-curricular activities etc. They can take a look at the timetable, schedule of the week, reports on tests, exams etc.
- ★ **Teachers Module :** Operations such as creation of schedules, releasing examination details, report submission, forums etc. are tied with this module. Teachers can log into their account and get the most updated reports on students' attendance, their performance etc. They can get in touch with the parents too. It helps teachers in reducing their workload. They can get real-time visibility in data related to each and every student they teach. It allows teachers to be ready with future plans for the students too.

- ★ **Admin module :** Module centrally takes care of every school related task or activity with utmost care. Offers a convenient way to interact or communicate with your school community or others who are directly or indirectly a part of your school. It is an effective tool which can help you in managing information in the best way.

FEATURE SET

- ★ **Admission Management :** It facilitates the user in managing all admission related activities like student admission, fee collection, seat allocation, cancelling the admission, issue of transfer certificate etc.
- ★ **Teacher Management** Helps in managing all teacher-related activities like 'allotment of classes', 'salary payment', 'class-allotment', 'leave calculation', students-parent meetings and many more.
- ★ **Parent Management** It assists you in managing all parent concerned activities. You can generate reports regarding parent-student meeting, send mails about student performances and meeting schedules.
- ★ **Student Management** Assists in supervising all student activities and their performance. Either class-wise/ individual student reports can be generated, with an option to trace a specific name/roll number.
- ★ **Fee Management** Gives control over fee concerned tasks. Generates accurate and transparent reports of fee management tasks like 'fee collection', 'discount offered', 'due reports' and 'paid reports' etc.
- ★ **Exam Management** Generate exam schedules within few minutes. You can make an entry or generate reports on exams conducted and send results to students and parents using this feature.

SCHOOL & LIBRARY MANAGEMENT

- ★ Attendance Management A unique feature that allows you to track students' and staff/teachers attendance. You can generate student-wise/class-wise /group-wise reports and faculty/staff-wise reports also.
- ★ Accounting Solution It is a highly transparent system which gifts you supreme control over accounting processes. Just few clicks are enough to view all financial reports (fee paid, salary credited to teachers/staff etc).
- ★ Transportation Management A complete solution for your transportation system. Tracks details of routes, trips, fee received and in due etc. Records fuel and related expenditures either on fortnight or monthly basis.
- ★ Library Management Takes care of all library systems and maintains track record of "books arrived" or "books suggested by the students/teachers". Streamlines librarian tasks with options like "search books" / "book reminders".
- ★ Time Table Management Helps you in creation, maintenance and updation of student time tables. You can view class-wise reports as well as staff-wise report and send SMS reminders whenever required.
- ★ Housing & Hostel Management Manage everything at your school hostel. View reports on number of students or even teachers or other staff members taking hostel facilities. It reduces the efforts and time as well.

SIMPLICITY

- ★ Anyone with working knowledge of computers will be able to handle Web school. The whole software is based on simplicity itself. You will be able to master the running and the functions of this program very easily.
- ★ Can easily manage admission , course details , schedule classes , student attendance , schedule examinations , make results online

MOBILE FRIENDLY

- ★ Web school has been developed to work really well with mobile phones.
- ★ Means you can make use of this software without facing any kind of restriction based on location.
- ★ In addition it is compatible with all the browsers and smart phones

RESTAURANTS

KEY PRODUCT FEATURES

- ★ Touch Screen Interface (user friendly).
- ★ Item Recipe with costing.
- ★ Dine Inn Take Away Home Delivery.
- ★ CRM (Customer Relationship Management).
- ★ POS integrated with Accounts
- ★ Opening Cash Hand Over (shift wise).
- ★ Reports (POS reports Accounts Reports Inventory Reports MIS Reports).
- ★ Strong Security Module.
- ★ Add Comments(Default Comments).
- ★ Bill Discount & Item Discount.
- ★ Cash Drop
- ★ Category Wise Printing in Desired Kitchen Department.
- ★ Multi Branches option
- ★ Multiple Mode of payment

PERFECT RESTAURANT POS SOLUTION

In addition to the general POS features we equipped our software with some extra restaurant oriented features like Dine-In sales; Carry-out and Delivery sales are all added, to help you run your business efficiently.
